Endwall Column attachment at Low Eave located between Eave Strut and Purlin

Notes:
1.) See AC00918 / AC00922 for Jamb/Support Column attachment when located at same Purlin space (or adjacent Purlin space) as Endwall Column.
2.) Bridge Channel may span multiple Purlin spaces when required.
3.) Wind Edge Strip Purlins, when required, do not attach to Bridge Channel.
4.) Purlins, Purlin Strut and Eave Strut extends past Bridge Channel flange when "Optional" Overhang or Facade is required at endwall.

(4) \( \frac{3}{8} \)\( \bar{\Omega} \) Bolts

Eave Strut
(Depth and Shape varies by Roof Slope)

Purlin Strut
(When required.)

Bridge Channel
Cold Formed - BGC_ _ _ (Shown)
Hot Rolled - BG_ _ _ (Similar)

(4) \( \frac{3}{8} \)\( \bar{\Omega} \) Bolts
(Typical at Purlins and Purlin Strut)

(4) \( \frac{3}{4} \)\( \bar{\Omega} \) A325 Bolts

Endwall Column or Column Extension
(Bolt to downhill side of Connection Plate.)
