A&S BUILDING SYSTEMS

For more than 50 years, A&S Building Systems has been an industry leader in the design and fabrication of prefabricated metal buildings for manufacturing, commercial, educational, religious, aviation and recreational facilities throughout the United States. With an average length of service of 20 years, the employees of A&S have the industry experience, knowledge and skill sets that allow them to embrace any scope of work, regardless of complexity.

A&S offers a full line of services including a complete line of metal roofing, including standing seam, retrofit and flat panel roof systems. Along with its competitive pricing, A&S provides its customers with Energy Star ratings, Signature 200/300 color selections and weathertightness warranties. For those low-complex projects, the A&S Value Express Plus advanced web-based system can generate quotes in minutes based on builders’ specifications, with a guaranteed three-week shipment date.
AGRICULTURAL FACILITIES

From livestock barns, riding arenas, farm equipment storage and more, A&S Building Systems has been serving the metal building needs of the American agricultural community for over 50 years. Whether it’s a new complex steel structure or an addition to an existing building, we can provide a cost-effective, low-maintenance steel building that will meet your agricultural needs.
Commercial and retail facilities rely heavily on appearance of their buildings to project a favorable image to their customers. A&S Building Systems pays strict attention to every detail. From roof slope to overhang design, we make sure that each project is as aesthetically appealing as it is functional.
HANGARS & AVIATION

A&S Building Systems specializes in the design and construction of sales/service complexes, single hangars and maintenance facilities. We can provide hangar designs based upon standard sizes, or create custom designs to meet your exact requirements and specifications. We have established a leadership position in hangar design and construction, based upon our experience, exceptional designs, and above all, our ability to provide our customers with a single source capability. To learn more, please review our Hangar and Aviation brochure for additional details.
For over 50 years, A&S Building Systems has been a premier manufacturer in the metal building construction industry, not only because of the superior buildings we provide, but also the relationships we forge. Recreational facilities, such as indoor arenas, require clear span designs that produce unobstructed space. Office and maintenance facilities require layouts with the understanding of your particular needs.
RELIGIOUS FACILITIES

With the evolution of new products and services, religious facilities have become a standard type of construction in the metal building industry. A single source capability affords A&S Building Systems a unique position in the architectural market. Each project is specifically designed for your requirements and specifications. Because of the increasing complex nature of construction-related matters, such as site selection, code compliance, scheduling, coordination of subcontractors, and quality control of the completed project, A&S Building Systems believes the best return on a client’s investment is achieved by working with a professional A&S builder. For this reason, A&S Building Systems markets its metal building systems through its authorized Builder network.
WAREHOUSE/DISTRIBUTION FACILITIES

Warehouse and distribution facilities require clear span designs, which provide immense unobstructed manufacturing and storage areas. The fabrication of superior products translates into clean architecturally appealing structures. Whether you’re interested in a standing seam or built up roof system, tilt up concrete or metal wall panels, A&S Building Systems can maximize your building construction.
EDUCATIONAL FACILITIES

Many educational buildings have a strict budget, which require school architects to turn to metal building construction as a cost-efficient alternative for classroom facilities. A&S Building Systems, a division of NCI, has the experience in providing high profile school projects, in conjunction with MBCI, another NCI division. This partnership has proven time and time again to be a winning combination. Whether you need a gymnasium, covered Olympic-sized pool or a brand new school complex, A&S Building Systems is right on target.
Value Express™

If you need a low-complexity building quickly, look no further than ValueExpressPlus™. Our advanced web-based pricing system greatly simplifies the ordering process, allowing you to generate a metal building quote, based on your specifications, in a matter of minutes. It’s fast, easy, and guaranteed three-week shipments are available.
Descriptions and specifications contained herein were in effect at the time this publication was approved for printing. In a continuing effort to refine and improve products, A&S reserves the right to discontinue products at any time or change specifications and/or designs without incurring obligation. To ensure you have the latest information available, please inquire or visit our website at www.a-s.com. Application details are for illustration purposes only and may not be appropriate for all environmental conditions, building designs, or panel profiles. Projects should be designed to conform to applicable building codes, regulations and accepted industry practices. If there is a conflict between this manual and project erection drawings, the erection drawings will take precedence.
